

EXHIBIT 45  
DATE 3/25/2009  
SB 236

Dear House Judiciary Committee Members:

I strongly support SB 236. The United States has flaunted itself as a defender of human rights, however, the use of the death penalty violates international human rights codes. Too many people have been put to death, who have been later been proven innocent. Not only does the death penalty violate human rights but it also is much more fiscally costly. When you vote yes for SB 236 you will be voting in favor of human rights.

Josh Schott
